PROFESSIONAL SUMMARY

Product Designer with 5+ years of experience across fintech, enterprise SaaS, and agri-tech. Led the redesign of Tata Capital Wealth's investment platform and designed MeeroLink's farmer platform supporting 1,900+ farmers across 5,000+ acres. I thrive in simplifying complex, regulated, and operationally intensive products by combining research, systems thinking, and interaction design.

WORK EXPERIENCE

UX Designer | [ScreenRoot](#) | Panjim, Goa (Sept 2025 – Apr 2026)

- Led end-to-end UX for Tata Capital Wealth's investment app (**5M+ downloads, 600K+ registered users, 4.1★ rating**), redesigning onboarding and portfolio flows that lifted task success from **81% to 95%** and cut form abandonment from **42% to 22%**.
- Reworked SIP creation and fund discovery, reducing SIP setup time from **4.5 to 2.5 minutes** and fund search time from **95 to 45 seconds**, while preserving the information depth required for regulated financial decisions.
- Restructured RM-assisted onboarding around **role-based ownership** rather than automation, moving paperwork handling from investors to relationship managers.
- Designed MeeroLink's **dual-surface platform** for **2,400+ tracked farms** and **53+ field agents**, reaching **94% dashboard adoption** within three months.
- Cut advisory report-to-action time from **6 days to 1 day** and raised field data sync success from **73% to 99.6%**, using a shared "health card" visual language across a low-end Android app and an operations dashboard.

Creative Director / Product Designer | [How Iconic Design Studio](#) | Bengaluru, KA (Mar 2023 – Feb 2025)

- **Led end-to-end product design** across **6 consumer brands**, partnering directly with founders from discovery through Shopify implementation.
- **Designed conversion-focused Shopify experiences** across consumer brands, simplifying purchase journeys through customer behaviour insights.
- **Facilitated 20+ product workshops and design reviews** with founders and business leaders, aligning customer insights, business goals, and technical constraints into focused product decisions.
- **Directed brand identity and scalable visual systems** across **5 consumer brands**, ensuring consistency across products, websites, marketing, and packaging.
- **Mentored designers and established design review practices**, raising execution quality and fostering stronger product thinking across the studio.

UX Designer | **NOCT** | Panchgani, MH (Jun 2022 – Feb 2023)

- Led UX for Messaging within Verizon's UCaaS platform, a **10+ designer, 8-month** effort, synthesizing **60+ hours of research** across **8 user personas** into interaction decisions applied across web, iOS, and Android.
- Prioritized bundled permission requests at onboarding after testing showed a **75% preference** over contextual prompts, and anchored a persistent Compose entry point based on a **68% preference** in testing.
- Introduced a persistent, stripped-down multitasking mode for in-meeting messaging, validated by **73% of tested users**, and expanded the shared design system to **30+ reusable components**.

Product Designer | **FlashTech** | Pune, MH (Oct 2020 – Apr 2022)

- **Delivered 20+ production-ready interfaces** across web and mobile for **3 primary e-commerce clients**, translating business requirements into intuitive digital experiences.
- **Improved onboarding and core user journeys** through **8 iterative design cycles**, incorporating usability feedback before engineering handoff.
- **Collaborated within a 20-member cross-functional product team**, delivering web and mobile experiences across **3 client engagements**.
- **Partnered closely with developers throughout two-week Agile sprints**, maintaining design fidelity from concept through production.

SELECTED AI PROJECTS

Sherlock | Agentic Lead Generation System (Personal Project | 2026)

Role: Product Designer • AI Workflow Designer • Builder

- **Designed and built** an AI-native lead generation system using **Google ADK**, automating research, enrichment, qualification, and outreach preparation to reduce manual prospecting by **~75%**.
- **Designed end-to-end AI workflows** using multi-agent orchestration and human-in-the-loop interactions to improve transparency and decision-making.

AREAS OF EXPERTISE

- Product Discovery
- User Research
- Information Architecture
- Interaction Design
- Design Systems
- Enterprise SaaS
- Fintech & Wealth Management
- Cross-functional Collaboration
- AI-assisted Product Design
- Prototyping & Usability Testing

EDUCATION

Bachelor of Computer Applications (BCA) | Himalayan University (2018 -2021)
